

# Prison Breakout

## About the event:

Gear up and help your prisoner friend get out of the prison.

## Objective:

The main idea is to help your friend (an Autonomous Bot, a LFR) escape the prison, with the help of a Manual Bot, by guiding him throughout the track and helping him avoid any sort of obstruction during the escape.

## Bot Specifications:

1. The bot dimensions must not exceed 25\*25\*20 cm (including any sort of extensions or mechanism used).
2. Contestants are allowed to bring their own Autonomous Bot (choice to be taken by the team members and to be informed before the competition).
3. The manual bot must be controlled wirelessly, using Bluetooth or WiFi.
4. The LFR must be completely autonomous, and cannot be touched once the movement of the bot starts.

## Competition Rules:

1. Teams will be given 15 minutes to calibrate their bots , and check all their connections and necessary equipment's before the start of competition.
2. No sort of modifications to the bot is allowed once it enters the arena.
3. Only one team member is allowed to control the manual bot. The controller cannot be switched during the run.

## \*\*\*\*Important Points:

1. Teams must come to compete during the required time interval. No teams will be entertained after the allotted time period.
2. Wired Robot will not be entertained.
3. Teams ignoring any sort of rules and regulations will be penalized accordingly.
4. The decision taken by the coordinators and co-coordinators will be taken as final word.
5. Teams will be informed about their results only after all the teams are finished competing.
